## ILLUSTRATIONS

### FIGURES

Figure  
No.

1. Geographic provinces of the Kitsap Peninsula and certain adjacent islands .....	5		
2. Water-Year, October - April and May - September precipitation at Port Townsend and Grapeview stations .....	10		
3. Mean monthly precipitation at various stations for the period 1946-60 .....	13		
4. Mean, mean minimum and mean maximum monthly temperatures at Port Townsend and Grapeview stations .....	14		
5. Mean annual water budget at Grapeview root zone water holding capacity of 10 inches .....	16		
6. Mean annual water budget at Grapeview root zone water holding capacity of 2 inches .....	17		
7. Mean annual water budget at Port Townsend - root zone water holding capacity of 10 inches .	18		
8. Mean annual water budget at Port Townsend - root zone water holding capacity of 2 inches ..	19		
9. Diagram showing well and locations numbering system .....	24		
10. Diagrammatic west - east cross section of the southern Puget Sound lowland, showing a tentative correlation between the Pleistocene stratigraphic units of the Kitsap Peninsula and the Pierce County mainland .....	25		
11. Tertiary basalt flows exposed in road cut along Sinclair Inlet .....	27		
12. Blakeley Formation .....	27		
13. Pre-Salmon Springs(?) deposits, undifferentiated .....	28		
14. Salmon Springs(?) Drift .....	29		
15. Kitsap Formation (peat strata) .....	30		
16. Kitsap(?) Formation.....	31		
17. Unnamed gravel .....	32		
18. Colvos Sand .....	33		
19. Vashon advance outwash .....	34		
20. Vashon till .....	35		
21. Vashon ablation till .....	35		
22. Glacial erratic .....	35		
23. Vashon recessional outwash .....	36		
24. Precipitation at Bremerton and hydrographs of three wells in the Kitsap Peninsula .....	49		
25. Streamflow hydrographs of Mission and Gold Creeks .....	52		
26. Streamflow hydrographs of Tahuya River and Dewatto Creek .....	53		
27. Streamflow hydrographs of Dogfish and Chico Creeks .....	54		
28. Streamflow hydrographs of Blackjack and Burley Creeks .....	55		
29. Water-year mean discharges for Gold Creek .....	56		
30. Bar chart of gaging station records .....	57		
31. Maximum - minimum discharge hydrographs for years 1946-59, Union River near Bremerton ..	70		
32. Maximum, minimum and average monthly discharge for the period 1946-59, Union River near Bremerton .....	70		
33. Flow-duration curve for the period 1946-59, Union River near Bremerton .....	70		
34. Monthly flow-duration curves for the period 1946-59, Union River near Bremerton .....	71		
35. Maximum - minimum discharge hydrographs for years 1947-59, Union River near Belfair .....	72		
36. Maximum, minimum and average monthly discharge for the period 1947-59, Union River near Belfair .....	72		
37. Flow-duration curve for the period 1948-59, Union River near Belfair .....	72		
38. Monthly flow-duration curves for the period 1948-59, Union River near Belfair .....	73		
39. Maximum - minimum discharge hydrographs for years 1945-53, Mission Creek near Bremerton ..	74		
40. Maximum, minimum and average monthly discharge for the period 1945-53, Mission Creek near Bremerton .....	74		
41. Flow-duration curve for the period 1946-53, Mission Creek near Bremerton .....	74		
42. Monthly flow-duration curves for the period 1946-53, Mission Creek near Bremerton .....	75		
43. Maximum - minimum discharge hydrographs for years 1946-53, Mission Creek near Belfair .....	76		
44. Maximum, minimum and average monthly discharge for the period 1946-53, Mission Creek near Belfair .....	76		
45. Flow-duration curve for the period 1946-53, Mission Creek near Belfair .....	76		
46. Monthly flow-duration curves for the period 1946-53, Mission Creek near Belfair .....	77		
47. Maximum - minimum discharge hydrographs for years 1946-60, Gold Creek near Bremerton .....	78		
48. Maximum, minimum and average discharge for the period 1946-60, Gold Creek near Bremerton .....	78		
49. Flow-duration curve for the period 1946-60, Gold Creek near Bremerton .....	78		
50. Monthly flow-duration curves for the period 1946-60, Gold Creek near Bremerton .....	79		
51. Maximum - minimum discharge hydrographs for years 1945-56, Tahuya River near Bremerton ..	80		
52. Maximum, minimum and average monthly discharge for the period 1945-56, Tahuya River near Bremerton .....	80		

Figure No.	Page	Figure No.	Page
53. Flow-duration curve for the period 1946-56, Tahuya River near Bremerton .....	80	79. Discharge-duration hydrographs of Tahuya River near Belfair (0675) and Huge Creek near Wauna (0735) .....	116
54. Monthly flow-duration curves for the period 1946-56, Tahuya River near Bremerton .....	81	80. Annual maximum discharge of Union River near Belfair (0635), Tahuya River near Belfair (0675) and Dewatto Creek near Dewatto (0685) .....	140
55. Maximum - minimum discharge hydrographs for years 1945-53, Panther Creek near Bremerton	82	81. Magnitude and recurrence interval of annual floods; Union River near Belfair (0635), Tahuya River near Belfair (0675), and Dewatto Creek near Dewatto (0685) .....	141
56. Maximum, minimum and average monthly dis- charge for the period 1945-53, Panther Creek near Bremerton .....	82	82. Magnitude and percent chance of annual floods; Union River near Belfair (0635), Tahuya River near Belfair (0675), and Dewatto Creek near Dewatto (0685) .....	141
57. Flow-duration curve for the period 1946-53, Panther Creek near Bremerton .....	82	83. Reservoir area and capacity curves, Union River Reservoir .....	146
58. Monthly flow-duration curves for the period 1946-53, Panther Creek near Bremerton .....	83	84. Reservoir capacity curve, Tahuya Lake .....	146
59. Maximum - minimum discharge hydrographs for years 1945-56, Tahuya River near Belfair ...	84	85. Location of wells and spring sampled for chemical analysis, and geologic source of ground-water samples .....	156
60. Maximum, minimum and average monthly dis- charge for the period 1945-56, Tahuya River near Belfair .....	84	86. Distribution of silica, potassium, phosphate, and dissolved-solids concentrations relative to geologic source of ground water of the Kitsap Peninsula and certain adjacent islands. ....	158
61. Flow-duration curve for the period 1946-56, Tahuya River near Belfair .....	84	87. Map showing iron concentrations of ground- water samples from the Kitsap Peninsula and certain adjacent islands .....	160
62. Monthly flow-duration curves for the period 1946-56, Tahuya River near Belfair .....	85	88. Relation between potassium concentration, phosphate concentration, and water-bearing formation for ground water of the Kitsap Pen- insula and certain adjacent islands .....	161
63. Maximum - minimum discharge hydrographs for years 1947-54, 1958-60, Dewatto Creek near Dewatto .....	86	89. Location of surface-water sampling sites .....	163
64. Maximum, minimum and average monthly dis- charge for the period 1947-54, 1958-60, Dewatto Creek near Dewatto .....	86	90. Specific conductance of surface water during January-February 1961 .....	163
65. Flow-duration curve for the period 1948-54, 1959-60, Dewatto Creek near Dewatto .....	86	91. Color intensity of surface water during January-February 1961 .....	165
66. Monthly flow-duration curves for the period 1948-54, 1959-60, Dewatto Creek near Dewatto .....	87	92. Authorized surface-water use in study area .....	168
67. Maximum - minimum discharge hydrographs for years 1947-60, Dogfish Creek near Poulsbo .	88	93. Present and potential use of report-area mean annual yield in acre-feet per year .....	168
68. Maximum, minimum and average monthly dis- charge for the period 1947-60, Dogfish Creek near Poulsbo .....	88		
69. Flow-duration curve for the period 1948-60, Dogfish Creek near Poulsbo .....	88		
70. Monthly flow-duration curves for the period 1948-60, Dogfish Creek near Poulsbo .....	89		
71. Maximum - minimum discharge hydrographs for years 1947-60, Huge Creek near Wauna ....	90		
72. Maximum, minimum and average monthly dis- charge for the period 1947-60, Hugh Creek near Wauna .....	90		
73. Flow-duration curve for the period 1948-60, Hugh Creek near Wauna .....	90		
74. Monthly flow-duration curves for the period 1948-60, Huge Creek near Wauna .....	91		
75. Discharge-duration hydrographs of Union River near Belfair (0635) and Mission Creek near Bremerton (0645) .....	112		
76. Discharge-duration hydrographs of Mission Creek near Belfair (0650) and Gold Creek near Bremerton (0655) .....	113		
77. Discharge-duration hydrographs of Tahuya River near Bremerton (0660) and Dewatto Creek near Dewatto (0685) .....	114		
78. Discharge-duration hydrographs of Panther Creek near Bremerton (0670) and Dogfish Creek near Poulsbo (0700) .....	115		

TABLES

Table No.	Page	Table No.	Page
1. Statistics showing the variation of water-year precipitation .....	11	28. Discharge, in cubic feet per second, equaled or exceeded for specified percent of time-- 1946-53, Mission Creek near Bremerton ....	104
2. A summary of stratigraphic units of Pleistocene age in the Kitsap Peninsula .....	37	29. Maximum, minimum and average of the monthly discharges, in acre-feet, for the period 1946-53, Mission Creek near Belfair ....	104
3. Wells on the Northern upland capable of producing moderate to large supplies of ground water .....	41	30. Discharge, in cubic feet per second, equaled or exceeded for specified percent of time-- 1946-53, Mission Creek near Belfair ....	104
4. Wells on the Central upland capable of producing moderate to large supplies of ground water .....	42	31. Maximum, minimum and average of the monthly discharges, in acre-feet, for the period 1946-60, Gold Creek near Bremerton .....	105
5. Wells capable of producing moderate to large supplies of ground water on Bainbridge Island ..	42	32. Discharge, in cubic feet per second, equaled or exceeded for specified percent of time-- 1946-60, Gold Creek near Bremerton .....	105
6. Wells capable of producing moderate to large supplies of ground water on the Western upland ..	43	33. Maximum, minimum and average of the monthly discharges, in acre-feet, for the period 1945-56, Tahuya River near Bremerton .....	105
7. Wells capable of producing moderate to large supplies of ground water on the Southern upland .....	44	34. Discharge, in cubic feet per second, equaled or exceeded for specified percent of time-- 1946-56, Tahuya River near Bremerton .....	105
8. Wells capable of producing moderate to large supplies of ground water on Vashon and Maury Islands .....	46	35. Maximum, minimum and average of the monthly discharges, in acre-feet, for the period 1945-53, Panther Creek near Bremerton ....	106
9. Wells capable of producing moderate to large supplies of ground water on the Gig Harbor peninsula and Fox Island .....	46	36. Discharge, in cubic feet per second, equaled or exceeded for specified percent of time-- 1946-53, Panther Creek near Bremerton ....	106
10. Summary of gaging station streamflow records....	58	37. Maximum, minimum and average of the monthly discharges, in acre-feet, for the period 1945-56, Tahuya River near Belfair .....	106
11. Miscellaneous low flow discharge measurement ..	61	38. Discharge, in cubic feet per second, equaled or exceeded for specified percent of time-- 1946-56, Tahuya River near Belfair .....	106
12. Maximum - minimum daily discharge records, Union River near Bremerton .....	92	39. Maximum, minimum and average of the monthly discharges, in acre-feet, for the period 1947-54, 1958-60, Dewatto Creek near Dewatto .....	107
13. Maximum - minimum daily discharge records, Union River near Belfair .....	93	40. Discharge, in cubic feet per second, equaled or exceeded for specified percent of time-- 1948-54, 1959-60, Dewatto Creek near Dewatto .....	107
14. Maximum - minimum daily discharge records, Mission Creek near Bremerton .....	94	41. Maximum, minimum and average of the monthly discharges, in acre-feet, for the period 1947-60, Dogfish Creek near Poulsbo .....	107
15. Maximum - minimum daily discharge records, Mission Creek near Belfair .....	95	42. Discharge, in cubic feet per second, equaled or exceeded for specified percent of time-- 1948-60, Dogfish Creek near Poulsbo .....	107
16. Maximum - minimum daily discharge records, Gold Creek near Bremerton .....	96	43. Maximum, minimum and average of the monthly discharges, in acre-feet, for the period 1947-60, Huge Creek near Wauna .....	108
17. Maximum - minimum daily discharge records, Tahuya River near Bremerton .....	97	44. Discharge, in cubic feet per second, equaled or exceeded for specified percent of time-- 1948-60, Huge Creek near Wauna .....	108
18. Maximum - minimum daily discharge records, Panther Creek near Bremerton .....	98	45. Synthetic annual runoff ratios by water years for Grapeview and various related statistics...	109
19. Maximum - minimum daily discharge records, Tahuya River near Belfair .....	99	46. Correlation of synthetic Grapeview runoff ratios with measured runoff of various report area streams .....	110
20. Maximum - minimum daily discharge records, Dewatto Creek near Dewatto .....	100	47. Measured mean annual runoff in inches adjusted by Grapeview runoff ratios to the periods 1946-60 and 1934-59 .....	111
21. Maximum - minimum daily discharge records, Dogfish Creek near Poulsbo .....	101	48. Surface water evaluation .....	118
22. Maximum - minimum daily discharge records, Huge Creek near Wauna .....	102		
23. Maximum, minimum and average of the monthly discharges, in acre-feet, for the period 1946-59, Union River near Bremerton .....	103		
24. Discharge, in cubic feet per second, equaled or exceeded for specified percent of time-- 1946-59, Union River near Bremerton .....	103		
25. Maximum, minimum and average of the monthly discharges, in acre-feet, for the period 1947-59, Union River near Belfair .....	103		
26. Discharge, in cubic feet per second, equaled or exceeded for specified percent of time-- 1948-59, Union River near Belfair .....	103		
27. Maximum, minimum and average of the monthly discharges, in acre-feet, for the period 1945-53, Mission Creek near Bremerton .....	104		

Table  
No.

49. Statistics showing the variation of measured water-year runoff .....	129
50. Existing lakes and reservoirs in the report area ..	130
51. Momentary annual maximum discharge, in cubic feet per second, of Union River near Belfair (0635), Tahuya River near Belfair (0675), and Dewatto Creek near Dewatto (0685) .....	140
52. Average recurrence interval and percent chance that specific discharges will be equaled or exceeded for Union River near Belfair (0635), Tahuya River near Belfair (0675), and Dewatto Creek near Dewatto (0685) .....	142
53. Existing major water development projects in the report area .....	143
54. Potential storage sites in the report area .....	143
55. Analysis of ground-water samples from the Kitsap Peninsula and adjacent islands .....	150
56. Analysis of surface water from the Kitsap Peninsula and adjacent islands .....	154

Page

Table  
No.

57. U. S. Public Health Service drinking water standards .....	156
58. U. S. Public Health Service recommended upper concentration limits for fluoride in drinking water .....	156
59. Water quality tolerances for industrial application .....	157
60. Concentration averages and ranges for constituents and properties of ground water from the principal formation units in the Kitsap Peninsula and adjacent islands .....	159
61. Partial analyses of samples of ground water probably influenced by salt-water contamination .....	160
62. Summary of surface-water use .....	169
63. Acreage covered by ground-water and surface-water irrigation in the Kitsap report area .....	172
64. Streams closed to further appropriation .....	174
65. Streams open to appropriation, subject to designated low-flow restrictions .....	174
